# solution pt. 1

Secure end-to-end encrypted email/mesasging platform

Allows for messaging between different official entities and also between individual citizens

Everyone always know when official messages are read, by whom. Keeps the government honest

No need for a physical Finnish address, removes the need for physical paper mail. Access anywhere

solution pt. 2

Unifies all official business under one platform

Mitigates spam with throwaway addresses which don't leak personal information. For one-off situations

Access management to delegate tasks to other people, like family.

Everything is archived, no lost tax forms or job offers in the spam box.
